

THE EVER-GRIP CLAMP INFORMATION SHEET

Our Ever-Grip Frack water tank clamp is the most well-designed clamp on the market.

Element Energy Solutions introduces the lightest, easiest to use, most cost effective frack tank clamp on the market.

Our innovative design features will save you time and money when installing and securing liners in your above ground frack water tanks.

Ever-Grip clamps take only seconds to install and provide a secure, snug fit that is second to none.

Designed tough, but 1/3 lighter than our competitors to speed installation and save on labour costs.

The clamp flexes to the contour of the tank leaving no gaps.

The Ever-Grip has an optimal spring size to maintain consistent tension.

Our clamps are welded robotically to maintain consistency and quality.

The tension on the clamp is rated at 200 pounds per square inch ensuring a solid grip.

Ergonomically designed, high visibility handles offer ease of use for the installer.

Ever-Grip clamps come complete with a racking system for transportation and storage

Element Energy solutions has the ability and willingness to customize clamps to fit your specific tanks.
